 triplem.dev

 Tehran, Iran

Senior Front-End Developer with 5+ years of experience designing and building scalable, enterprise-level web applications using modern JavaScript frameworks. Primarily focused on Vue.js and Nuxt, with professional experience in React and Next.js. Experienced in leading front-end teams, defining application architecture, reviewing code, and collaborating closely with product managers, designers, and back-end engineers to deliver high-quality software.

Strong expertise in TypeScript, Vue, Nuxt, React, Next.js, Vuetify, Tailwind CSS, Shadcn/UI, Shadcn Vue, Nuxt UI, and TanStack Query. Committed to writing clean, maintainable, and performant code while continuously improving development workflows and user experience. Passionate about solving complex technical challenges and building products that scale to large user bases.

• Education

Bachelor of Computer science

2019 - 2023

Institute/University: Tabriz university

Tabriz , East Azerbaijan, Iran

GPA: 15.89

• Work Experience

Front end developer

2019 - 2019

Off tabriz

Tabriz , East Azerbaijan, Iran

Tasks and Achievements

- As a freshman in university, we gathered to work on a project. The Project was about online shop, a web-based platform
- developed using Django and pure HTML, CSS, JS. The result was a failure, but I learned so much in that time.
- This project made me face new things such as version control systems and jquery.

Front-End Developer

January 2026 - Present

Kherad varzan Tarazoo

Tehran, Iran

Tasks and Achievements

Built a server-rendered legal-services marketplace (Next.js 16 / React 19 / TypeScript) connecting clients with lawyers, featuring online consultation booking, an AI legal-question assistant, a dynamic content page-builder, and secure authentication – with full RTL/Persian localization.

Designed a centralized, type-safe API layer (apiFetch) with automatic server/client auth-token injection, query-param handling, Sentry error capture, and structured pino logging.

tarazoo

For: Kherad Varzan Tarazoo

January 2026

Developed the frontend of Tarazoo, an SSR legal-consultation platform where users browse services, ask legal questions (AI-assisted), and book paid reservations with lawyers.

Implemented a modular architecture using the Next.js App Router, TanStack Query for server-state, Redux Toolkit for client-state, and NextAuth for OTP-based authentication, all styled with a custom Tailwind CSS 4 + Radix UI design system. Deployed via Docker/Nginx with Sentry error monitoring and structured logging.

features:

Built a dynamic page-builder system rendering configurable content blocks (hero, services, benefits, FAQ, workflow, blog/news, comments) from backend-driven data.

Developed an AI-assisted legal question feature and a lawyer reservation/booking flow with integrated payment handling.

Built robust forms using React Hook Form + Zod for schema validation across auth, questions, and reservation flows.
