| **Git** | 80% |
| **SCSS / SASS** | 80% |

Senior Front-End Developer with 5+ years of experience building scalable, production-grade web applications, including ERPs, learning management systems, SSR marketplaces and SaaS products. Specialized in Vue.js and Nuxt, with professional experience in React and Next.js. Experienced in leading front-end teams, defining application architecture, reviewing code, and collaborating closely with product managers, designers and back-end engineers. Recently led the front end of four Nuxt-based products (Kadiato, Kafiato, M1Planner and Herkoul), delivering PWAs with SSR, SEO, multi-language and RTL support. Strong in TypeScript, Tailwind CSS, Vuetify, Nuxt UI, Shadcn and TanStack Query, with a focus on clean, maintainable and performant code.

## Education

### Bachelor of Computer Science

**2019 - 2023**

Institute/University: University of Tabriz

Tabriz , East Azerbaijan, Iran

GPA: 15.89 / 20

## Work Experience

### Front-End Developer

**March 2026 - Present**

Kherad Varzan Tarazoo

Tehran, Iran

**Tasks and Achievements**

- Built the front end of etarazoo.com, a server-rendered legal-services marketplace (Next.js 16, React 19, TypeScript) connecting clients with lawyers: online consultation booking, an AI legal-question assistant, a dynamic content page-builder and OTP authentication, with full RTL/Persian localization.
- Designed a centralized, type-safe API layer (apiFetch) with automatic server/client auth-token injection, query-param handling, Sentry error capture and structured pino logging.
- Focused on SSR, SEO and performance, using TanStack Query and Redux Toolkit for state, React Hook Form with Zod for forms, and Docker/Nginx for deployment.

**SSR & SEO** 80%

**PWA** 80%

**i18n & RTL** 80%

**Azerbaijani :** Proficient

Native speaker

### Senior Front-End Developer

**December 2024 - March 2026**

IKA Engineering Co

Tehran, Iran

**Tasks and Achievements**

- Developed the front end of IKA, an ERP for inspection companies that brings the people, contracts and inspections behind every job into one workspace.
- Built the application with Nuxt, Vue, Vuetify, TypeScript and Tailwind CSS, taking the product from development into its current support phase.

### Front-End Developer

**July 2022 - July 2024**

Smart-Sino UK

China

**Tasks and Achievements**

- Developed the front end of an advanced Learning Management System (LMS) that centralizes student and teacher data in one place.
- Built class-scheduling features to manage teacher availability and class sessions.
- Built with Nuxt, Vue, Vuetify and TypeScript in a fully remote team.

### Front-End Developer

**September 2021 - July 2022**

GreenSoft

Iran

**Tasks and Achievements**

- Developed and maintained Vue.js user interfaces with the Vuetify component library (first professional front-end role).
- Customized and extended Vue components and integrated third-party libraries into production code.
- Adopted Git-based collaborative workflows within the development team.

### Front-End Developer (Student Project)

**2019 - 2019**

Off Tabriz

Tabriz , East Azerbaijan, Iran

**Tasks and Achievements**

- Built the front end of an online-shop platform with HTML, CSS, JavaScript and jQuery on a Django back end, as part of a university team project.
- Gained first hands-on experience with Git and collaborative version-control workflows.

## Projects

### Kadiato

For: M1 (team product)

2026

- Gift-wishlist social network (PWA) for birthdays, weddings and holidays, shareable via short links, QR codes and auto-generated Instagram story images.
- Led the Nuxt front end: public/private lists with mutual-follow visibility, gift tracking and confirmation, an occasion calendar with reminders, and theme customization.
- Multi-language UI (Persian RTL plus English, German, Turkish, Russian and Chinese) with SEO-ready server-rendered pages.

Link: https://kadiato.com

### Kafiato

For: M1 (team product)

2026

- Monthly coffee-subscription platform connecting coffee lovers with cafes: prepaid plans, gift subscriptions and a digital coffee card with a rotating QR / 6-digit code.
- Led the Nuxt front end across the marketing site, the customer PWA and the cafe-owner panel (online menu, accounting, customers, reservations and job postings).
- Built the wallet with cashback and referral rewards, plus a cafe map with search and online table reservations.

Link: https://kafiato.com

### M1Planner

For: M1 (team product)

2026

- All-in-one personal and team planner (web, PWA and Android) covering tasks, projects, habits, notes, meetings, money, sleep and reading.
- Led the Nuxt front end: customizable Today dashboard, calendar views, team projects with role-based access, Markdown notes and reports.
- 9-language UI with RTL support, Solar Hijri and Gregorian calendars, push/email/Telegram notifications, and Excel/CSV/JSON export.

Link: https://m1planner.com

### Herkoul

For: M1 (team product)

2026

- Persian fitness platform delivering personalized training and nutrition plans with online coaching.
- Led the Nuxt front end: goal-based program catalog, progress tracking (weight, measurements, PRs), exercise video demos and ticket-based coach support.
- Built a suite of free fitness tools (calorie/macro, 1RM, BMI, body-fat and barbell-plate calculators) in a mobile-first, dark-themed RTL interface.

Link: https://herkoul.com

### Tarazoo

For: Kherad Varzan Tarazoo

March 2026

- SSR legal-consultation platform where users browse legal services, ask AI-assisted legal questions and book paid sessions with lawyers.
- Modular Next.js App Router architecture with TanStack Query (server state), Redux Toolkit (client state), NextAuth OTP login and a custom Tailwind CSS 4 + Radix UI design system.
- Built a backend-driven page-builder (hero, services, FAQ, blog/news and comment blocks), the AI question flow and the lawyer reservation flow with integrated payments.

Link: https://etarazoo.com/

### Hayper Digital

For: Xiaomi Tabriz Representative Office

January 2025

Built the website for the Xiaomi representative office in Tabriz.

Link: https://hayperdigital.com/

### NCT Evo Website

For: NCT Tech Solutions

October 2024

- Corporate website for NCT Tech Solutions, an engineering, inspection, trade and IT services company.
- Built with Nuxt and Vue as a server-rendered, SEO-friendly site with service pages, a blog and a contact form.

Link: https://nctevo.com

### Carallumafit

August 2024

Built the front end of an online store selling weight-loss products.

Link: https://carallumafit.com/

### Pay to Moon

For: Personal project

- Crypto payment gateway (IPG) that lets online stores accept cryptocurrency payments through a simple website integration.
- Added WebsiteLess one-time payment links so businesses without a website can still accept crypto payments.
